

Rockland Energy Advisory Committee

Rockland Public Library @ 4:45 PM - January 6, 2015

Attendance: Larry Pritchett, Tony Coyne, Deb Donnelly, Brooks Winner, and Bill Pearce.

The minutes of December 16, 2014, were reviewed and approved by the Committee.

The intersection of Main Street and Park Street was extensively reviewed due to conflicting lighting installed. Larry also reviewed some possible realignment of a few lights on Main Street to improve street and crosswalk lighting. A triple headed fixture is being recommended for the intersection of Main Street and Rankin Street.

Larry showed the committee the remote access system for the Rockland Public Library. The radiant floor system does not appear to be operating at optimum efficiency.

The Committee might be able to assist with pendant cleaning and testing on some to be determined Monday evening.

Next Energy Advisory Committee is January 27, 2015, at 4:45 PM.
