

Rockland Energy Advisory Committee
March 25, 2014

Attendance: Larry Pritchett, Norma Athearn, and Bill Pearce. Guest: Arnold Esancy

The minutes of February 25, 2014, were reviewed and approved by the Committee.

The Committee reviewed the information Larry had emailed to the Committee concerning replacing the lights on Main Street with LED lights. The grant proposal has double lights between the Ferry Terminal Park and the Brown Bag. The proposed light wattage for the 8 foot tall lights on Main Street were also reviewed.

Additional photometric analysis will be done. The Committee reviewed what Larry presented and discovered some confusion about the data. This analysis was done for the proposed lighting, not for the actually what was currently in effect.

Larry updated the Committee about the legislation concerning municipalities taking ownership of the street lights on the shared utility poles. April 29, 2014, is the next meeting of the PUC.

Next Energy Advisory Committee is April 22, 2014, at 4:45 PM.
